# Linux Server Configuration

REVIEW

CODE REVIEW 7

HISTORY

## Meets Specifications

You made it!! Congratulations!! I'm very proud of you, and you should be as well!

I've reviewed just a small piece of your project, but everything looks great, with a great quality applied, keep it up!! 💪

I wish you the best in your career and once again congratulations! 🎉

- If you feel like I can be more helpful to you and other students in any manner, please use the feedback session to drop me a hint about it.

Regards,  
Daniel

## User Management

✓ You cannot log in as `root` remotely.

I will not comment on already met specifications. Congratulations on getting these done. 👍

✓ The SSH key submitted with the project can be used to log in as

Rate this review

`grader` on the server.

- ✓ The `grader` user can run commands using `sudo` to inspect files that are readable only by root.

## Security

- ✓ Only allow connections for `SSH` (port 2200), `HTTP` (port 80), and `NTP` (port 123).
- ✓ Key-based `SSH` authentication is enforced.
- ✓ All system packages have been updated to most recent versions.
- ✓ `SSH` is hosted on non-default port.

## Application Functionality

- ✓ The web server responds on port 80.
- ✓ Database server has been configured to serve data (PostgreSQL is recommended).
- ✓ Web server has been configured to serve the Item Catalog application as a WSGI app.

## Documentation

- ✓ A README file is included in the GitHub repo containing the following information: IP address, URL, summary of software installed, summary of configurations made, and a list of third-party resources used to complete this project.

Great job with your README, all necessary information is available

there. Remember that READMEs are intended to help you document your project and probably will help you in the future to remember how to do some things, especially working with configurations and things that can be put on step by steps.

You're already rocking but [here is a free course](#) of writing READMEs which you can also share with your colleagues if you find it useful - Free as a speech anyways! 😎
